# Lancaster Laboratories-Single Component Data Summary

**Sample Name:** **LCSA** 2/25/04F LCSVQ Sample ID: AB **Batchnumber: 040550003A**
Sample Amount: 200 ml Total Volume: 10 ml Analyst: 120 SDG: State:
Analyses: 00950

Analysis Report (A)

Injected on : FEB 25, 2004 16:55:54
Instrument : CP13--H6722A
Result file : 2C13051.19R
Calibration file : 2C13051.CAL
Method file : PESTD.MET

Analysis Report (B)

Injected on : FEB 25, 2004 16:55:54
Instrument : CP13--H6722B
Result file : 2C13051B.19R
Calibration file : 2C13051B.CAL
Method file : PESTDB.MET

**Summary Report**

| Compound Name | Column | Higher Amount Found | LOQ | MDL | Qualifiers | %Difference | Comments |
|---|---|---|---|---|---|---|---|
| Endosulfan II | | | | | | | |
| 4,4'-DDT | | | | | | | |
| Endrin aldehyde | | | | | | | |
| Methoxychlor | A | 1.926867 | 0.5 | 0.1 | | 1.38 | |
| Mirex | | | | | | | |
| Endo. sulfate | | | | | | | |
| Endrin ketone | B | 0.007011 | | | | ** 59.59 | |

### A. Sample Preparation:

Florisil cleanup was used to minimize interferences. No other problems were encountered with the preparation of the samples.

### B. Analysis:

The analysis was performed using the following runs:

- 1H14048, 1H14048B, 2H14048, 2H14048B

No problems were encountered. All continuing calibration data are within method specifications since if any individual target analytes have a %D value outside the 15% criteria, then the average %D value of the standard is within the 15% criteria.

### C. Quality Control:

The DCAA surrogate is outside the QC limits for sample UN7NV. Since the recovery is outside specification high and no analytes of interest have been detected, the data has been reported. All other reported surrogates are within the QC limits.

The matrix spike data are within the QC limits.

The LCS data are within the QC limits.

### D. Data Interpretation:

The method blank was evaluated to the MDL. Values between the MDL and the LOQ are reported with a "J" qualifier.

No further interpretation is needed.

Lancaster Laboratories

**Data codes:**

Detected analytes are reported using the higher of the two column results in accordance with the method. Data with analytes showing disparity >40% are further evaluated for reporting based on chromatographic appearance. The analytes will be coded with a comment number on the data sheet. The comments are explained below:

- 1569 - A disparity of >40% between the primary and confirmatory analysis occurred. Due to suspected interference, the lower result was reported.
- 1570 - A disparity of >40% between the primary and confirmatory analysis occurred. Since no chromatographic anomalies were apparent, the higher result was reported.

Data that indicates that manual integration was required would include the following codes:
1 = missed peak and 2 = improper baseline. The peaks that have been manually changed are indicated with an "M" on the raw data.

# CASE NARRATIVE FOR INORGANICS

Laboratory Name: Lancaster Laboratories

SDG Number: RAV01

Date Received: 02/19/04

Dilutions:

Refer to the analysis run logs for samples requiring dilutions.

Explanatory Notes:

The instrument detection limits (IDLs) are used for determining the U flags on the initial and continuing calibration blanks. The highest IDL is selected when multiple instruments are used for an analysis. The method detection limits (MDLs) are used for determining all other U flags.

Calibration Standards:

Instrument calibration standards are prepared monthly from stock solutions purchased from Aldrich Chemical, EM Science, Fisher Scientific, High Purity, Inorganic Ventures, JT Baker, Spex Industries Inc., Ultra Scientific, or VHG Laboratories.

Case Narrative reviewed and approved by:

| Zn | Zinc | 206.20 |

The 61E TRACE ICP uses a Crawford-Kunselman Noise Reduction Technique for lead and selenium. This requires the utilization of the first and second order wavelengths in the calculation of each of these metals determinations. The 61E TRACE ICP also utilizes Yttrium as an internal standard to compensate for fluctuations in nebulization and plasma conditions. All Yttrium readings are expressed in counts.

LEGEND

AK = Alpkem
IC = Ion Chromotagraphy
TOC = Total Organic Carbon
TOX = Total Organic Halogens
TC = Total Carbon
RA = Rapid Analyzer

*Note: The MDL and LOQ for moisture are the same to avoid inconsistencies between reporting types

**Note: To obtain values for Total phosphorus as PO4(#345,5894), multiply above values by 3.07

Reported MDL's are based on calculated MDLs for most compounds. Some reported MDLs are set higher based on our experience with specific compounds.

| 4219004 | 5GP24 | |
| 4219005 | UNIT5 | |

**ANALYSIS:**
No problems were encountered during analysis.

**QUALITY CONTROL AND NONCONFORMANCE SUMMARY:**
QC was within specification.

**DATA INTERPRETATION:**
Determination of corrosivity is based on the pH values.

No further interpretation is necessary for the data submitted.

Miscellaneous Wet Chemistry
SDG: RAV01

| Sample Info. | Matrix Spike Analysis | | | | | | | | | | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| | | | | | | | | | | | | | | | | | Matrix: SOIL | | |
| Sample Number | Sample Code | Batch Number | Parameter | ME | Analysis Date | BKG Sample | BKG Result | MS Sample | MS Spike Added | MS Result | MSD Sample | MSD Spike Added | MSD Result | Units | MS Rec (%) | MSD Rec (%) | Acceptance Window (%) | RPD (%) | % RPD Limits </= |
| 4219005 | UNIT5 | 04057112101 | Reactive Sulfide | TI | 2/26/04 | P219668 | 8.0 | P219668 | 553 | 196.6 | P219668 | 551 | 152.5 | mg/kg | 36 | 28 | 15 - 107 | 25 | 29 |

If the background and/or matrix spike/matrix spike duplicate result is less than five times the limit of quantitation, the RPD is not considered applicable and is program deleted.

If the background result was more than four times the spike added amount, the percent recovery is program deleted.

*Where quality is a science.*

# METHODOLOGY SUMMARY/REFERENCE

## *6292 TCL by 8260 (soil)*

The sample or extract of the sample is analyzed by purge and trap GC/MS.

Reference: Test Methods for Evaluating Solid Waste, SW-846, Method 8260B, Revision 2, December 1996

**********

## *6006 Solid Sample Pesticide Extraction*

A sonic probe extraction with hexane and acetone is used. Alternatively, the sample may be soxhlet extracted with hexane and acetone. Florisil cleanup is used to minimize interference.

Reference: Test Methods for Evaluating Solid Wastes, SW-846, Method 3550B, December 1996 (Sonic Probe)

**********

## *1225 TCL Pesticides in Solids*

The sample is solvent extracted and cleaned using a Florisil column. The resulting extract is quantitatively analyzed by gas chromatography with an electron capture detector.

Reference: Test Methods for Evaluating Solid Waste SW-846, Method 8081A/8082, December 1996

**********

## *4688/4689 TCL Semivolatiles by 8270C (soils)*

The sample is solvent extracted and then analyzed by GC/MS for the target compound list.

Reference: Test Methods for Evaluating Solid Waste SW-846, Method 8270C, Update III, December 1996

## 0111 Moisture (solid)

A well mixed sample is placed in a tared container and dried to constant weight in an oven at 103-105C. The decrease in weight is the total moisture.

Reference: Methods for Chemical Analysis of Water and Wastes USEPA 600/4-79-020, Method 160.3 (modified)

**********

## 0118 Moisture (solid)

This value reflects the background moisture value. It is used to calculate dry weight reports for matrix spike and matrix spike duplicate samples.

Reference: See background sample moisture method reference

**********

## 0121 Moisture Duplicate (solid)

This analysis is required to check the precision of the moisture analysis. The value is not used in report calculations.

Reference: See background sample moisture method reference

**********

## 7801 Moisture (Re-Entry)

A well-mixed sample is placed in a tared beaker and dried to constant weight in an oven at 103-105 C. The decrease in weight is the total moisture.

Reference: Methods for Chemical Analysis of Water and Wastes USEPA 600/4-79-020, Method 160.3 (modified)

METHODOLOGY

The specific methodologies used in obtaining the enclosed analytical results are indicated on the laboratory chronicles.

The recovery of fluoranthene was above QC limits in the LCS. Since fluoranthene was not detected in the sample, no further action was taken.

| 04702 | Carbazole | 86-74-8 | N.D. | 40. | 400. | ug/kg | 1 |

The recovery of fluoranthene was above QC limits in the LCS. Since fluoranthene was not detected in the sample, no further action was taken.

## CASE NARRATIVE

**Client: Draper Aden Associates, Inc.**
**SDG#: RAV03**

LANCASTER LABORATORIES
VOLATILES BY GC/MS

### SAMPLE NUMBERS :

| LL #'s | Sample Code | Matrix Soil | Comments |
|---|---|---|---|
| 4241634 | 5GP21 | X | |
| 4241635 | TGP2D | X | |
| 4241640 | 5GPTB | X | Client Blank |

### LABORATORY SUBMITTED QC:

| | | | |
|---|---|---|---|
| VBLKX61 | VBLKX61 | X | Method Blank |
| VBLKX66 | VBLKX66 | X | Method Blank |
| 4232854 | SEDT2 | X | Unspiked |
| 4232855 | SEDT2MS | X | Matrix Spike |
| 4232856 | SED72MSD | X | Matrix Spike Dup |
| LCSX61 | LCSX61 | X | Lab Control Sample |

### SAMPLE PREPARATION:

The soil samples were collected in the field in pre-preserved and pre-weighed vials. Once submitted to Lancaster Laboratories, the samples were re-weighed to determine the weight of the sample. Since an approximate amount of sample is collected in the field, the dilution factors may vary from sample to sample.

No problems were encountered during the sample preparation for the VOA fraction.

### ANALYSIS:

The method used for analysis was EPA SW846 Method 8260B.

No problems were encountered during the analysis of these samples.

0056

## QUALITY CONTROL and NONCONFORMANCE SUMMARY:

Only client requested compounds are addressed in this narrative.

All QC was within specifications.

## DATA INTERPRETATION:

No further interpretation is necessary for the data submitted.

Case Narrative reviewed and approved by:

# 4241640

File: /chem/HP09193.i/04mar29a.b/xm29s02.d
Sample: 5GPTB;4241640;2;0;;;
Injected At:29-MAR-2004 11:40
Calibration Time: 12-MAR-2004 08:04
Target Method: X8260SL.m
Blank Reference: xm29b03.d
Sublist: TCE

Sample Concentration Formula: On-Column Amount * (Vt/Ws)
Batch:X040821AC
Analyst:LCM01518
Instrument ID:HP09193.i
Standard Reference: xm29c01.d
Prep Factor:1.00
Units: ug/Kg

Matrix: SOIL
Level: Low
Sample Wt./Vol.: 5.0000 g (Ws)
Volume Purged: 5.0 ml.(Vt)

/chem/HP09193.i/04mar12a.b/xm12i01.d

Average areas and retention times from above standards are used for compa

Current Continuing Calibration Standard:

/chem/HP09193.i/04mar22b.b/xm22c03.d

RT Summary

| Internal Standard Name | File ID: xm22c03.d | ICAL RT | In Spec |
|---|---|---|---|
| t-Butyl Alcohol-d10 | 4.505 | 4.505 | Yes |
| Fluorobenzene | 7.952 | 7.955 | Yes |
| Chlorobenzene-d5 | 11.344 | 11.346 | Yes |
| 1,4-Dichlorobenzene-d4 | 13.205 | 13.204 | Yes |

A "No" indicates the retention time is greater than 30 seconds from the average RT.

Area Summary

| Internal Standard Name | File ID: xm22c03.d | ICAL Area | Low Limit | High Limit | In Spec |
|---|---|---|---|---|---|
| t-Butyl Alcohol-d10 | 250367 | 218847 | 109424 | 437694 | Yes |
| Fluorobenzene | 1764970 | 1537940 | 768970 | 3075880 | Yes |
| Chlorobenzene-d5 | 1401027 | 1173247 | 586624 | 2346494 | Yes |
| 1,4-Dichlorobenzene-d4 | 828766 | 689065 | 344532 | 1378130 | Yes |

A "No" indicates the internal standard area is outside acceptable QC limits.

# Lancaster Laboratories
# Continuing Calibration Internal Standard Check

Initial Calibration Standards:

/chem/HP09193.i/04mar12a.b/xm12i07.d
/chem/HP09193.i/04mar12a.b/xm12i05.d
/chem/HP09193.i/04mar12a.b/xm12i04.d
/chem/HP09193.i/04mar12a.b/xm12i03.d
/chem/HP09193.i/04mar12a.b/xm12i02.d
/chem/HP09193.i/04mar12a.b/xm12i01.d

Average areas and retention times from above standards are used for compa

Current Continuing Calibration Standard:

/chem/HP09193.i/04mar29a.b/xm29c01.d

RT Summary

| Internal Standard Name | File ID: xm29c01.d | ICAL RT | In Spec |
|---|---|---|---|
| t-Butyl Alcohol-d10 | 4.505 | 4.505 | Yes |
| Fluorobenzene | 7.955 | 7.955 | Yes |
| Chlorobenzene-d5 | 11.347 | 11.346 | Yes |
| 1,4-Dichlorobenzene-d4 | 13.205 | 13.204 | Yes |

A "No" indicates the retention time is greater than 30 seconds from the average RT.

Area Summary

| Internal Standard Name | File ID: xm29c01.d | ICAL Area | Low Limit | High Limit | In Spec |
|---|---|---|---|---|---|
| t-Butyl Alcohol-d10 | 187979 | 218847 | 109424 | 437694 | Yes |
| Fluorobenzene | 1433401 | 1537940 | 768970 | 3075880 | Yes |
| Chlorobenzene-d5 | 1136753 | 1173247 | 586624 | 2346494 | Yes |
| 1,4-Dichlorobenzene-d4 | 696250 | 689065 | 344532 | 1378130 | Yes |

A "No" indicates the internal standard area is outside acceptable QC limits.

## Case Narrative (continued)
## SDG: RAV03

All samples were analyzed for the SOW OLM03.2 list of semivolatile compounds.

3-Methylphenol and 4-methylphenol cannot be resolved under the chromatographic conditions used for sample analysis. The 4-methylphenol value is a combination of results from both compounds.

No problems were encountered during the analysis of these samples.

### QUALITY CONTROL AND NONCONFORMANCE SUMMARY:

The recovery of fluoranthene in 085LBLCS3 was above QC limits. This compound was not detected in sample analysis therefore no further action was taken.

All other QC was within specifications.

### DATA INTERPRETATION:

Only non-conformances for client requested compounds are addressed in this case narrative.

No further interpretation is necessary for the data submitted.

Case Narrative Reviewed and Approved by:

Christine M. Ratchford for CJN Date: 4-1-04

(1) Cannot be separated from Diphenylamine
4,6-Dinitro-2-methylphenol and 4-Nitrophenol are at 10 ng/ul in the 5 standard.
Benzoic acid, Pentachlorophenol and 2,4-Dinitrophenol are at 15 ng/ul in the 5 standard.
Benzidine Levels in the 5,15,30,50,80,120 standards are 15,45,90,150,240,360 ng/ul, respectively.
Benzoic acid, Pentachlorophenol and 2,4-Dinitrophenol are at 15 ng/ul, 30 ng/ul,40 ng/ul in the 5 ,15, 30 standards.

### A. Sample Preparation:

Florisil cleanup was used to minimize interferences. No other problems were encountered with the preparation of the samples.

### B. Analysis:

The analysis was performed using the following runs:

- 1D16082, 1D16082B, 3D16082, 3D16082B

No problems were encountered. All continuing calibration data are within method specifications since if any individual target analytes have a %D value outside the 15% criteria, then the average %D value of the standard is within the 15% criteria.

A retention time update was performed using calibration files 3D16082.06-.07 and the calibration name was changed to 2D16082.

### C. Quality Control:

All reported surrogates are within the QC limits.

The matrix spike data are within the QC limits.

5411

Lancaster Laboratories

The LCS data are within the QC limits.

**D. Data Interpretation:**

The method blank was evaluated to the MDL. Values between the MDL and the LOQ are reported with a "J" qualifier.

No further interpretation is needed.

**Data codes:**

Detected analytes are reported using the higher of the two column results in accordance with the method. Data with analytes showing disparity >40% are further evaluated for reporting based on chromatographic appearance. The analytes will be coded with a comment number on the data sheet. The comments are explained below:

- 1569 - A disparity of >40% between the primary and confirmatory analysis occurred. Due to suspected interference, the lower result was reported.
- 1570 - A disparity of >40% between the primary and confirmatory analysis occurred. Since no chromatographic anomalies were apparent, the higher result was reported.

Data that indicates that manual integration was required would include the following codes:
1 = missed peak and 2 = improper baseline. The peaks that have been manually changed are indicated with an "M" on the raw data.

**Narrative reviewed and approved by:**
